

Inventor R11 Introduction to Solid Modeling Quiz

The Inventor User Quiz measures a user's mastery of core concepts and techniques in Introductory functionality for Autodesk Inventor R11. Based on ASCENT's Inventor R11 Introduction to Solid Modeling training course, the quiz helps users identify gaps in their skills before proceeding on to advanced training.

Clients receive their results immediately upon completion of this quiz, indicating any training requirements. Quiz reports are also available at any time after the quiz is completed, and can be generated for groups of users as well as individuals.

Topics covered in the quiz include:

- General Concepts and Interface
- Sketching
- Sketch Constraints and Dimensions
- Creating Part Feature
- Part Modeling Technique
- Assembly Basics
- Assembly Tools
- Drawing Views
- Presentation and Viewing
- Annotation

The quiz is composed of 100 questions (multiple choice or true/false) in 10 sections.

Operating Requirements:

- Internet Connection
- Required operating system: Windows or UNIX
- Recommended browsers: Microsoft Internet Explorer, version 5 or higher
- Additional requirements: Cookies must be enabled to allow you to login
