

New Release of IMAGINiT Clarity Increases Efficiencies for Building Information Modelling Teams

Get Deeper Autodesk Dynamo and BIM 360 Software Integrations, Superior Task Automation, and Smart Analytics with IMAGINiT Clarity 2019.1

BALTIMORE, MD – November 13, 2018 – IMAGINiT Clarity helps project teams audit, identify and manage building information modelling (BIM) data to optimize overall project performance and save time. IMAGINiT Clarity saves customers hundreds of hours of redundant task work on every Autodesk Revit project regardless of whether the Revit model resides in Revit, Autodesk BIM 360 Design, or on a Revit server. [IMAGINiT Technologies'](#) software development experts will be on hand in Booth A221 at [Autodesk University \(AU\) 2018](#) in Las Vegas, NV, demonstrating the new features and capabilities of the 2019.1 release of IMAGINiT Clarity.

"BIM project teams find the time savings they gain through increased visibility and insights into their designs, as well as through the elimination of repetitive tasks, allows their team to complete projects earlier and on budget," says Bill Zavadil, chief operating officer for IMAGINiT Technologies. "Many customers have mandated that Clarity be a part of their BIM projects as the time savings across thousands of projects allow them to take on new customers and focus on their firm's growth and success."

Key New Features

IMAGINiT Clarity is compatible with Revit 2019 and previous versions of Revit, as well as current and previous versions of BIM 360 software, and includes several new features.

- **Increased Integration with BIM 360** allows users to automate models whether they are in BIM 360 Team, Collaboration for Revit, or BIM 360 Design. This added functionality expands team members' abilities to share and collaborate with project partners based on key milestones.
- **Deeper Clarity/Autodesk Dynamo Integration** makes it possible to import customized Dynamo scripting, automatically schedule it and have it run at specific times. Clarity 2019.1 supports Dynamo versions 1.3 and 2.0. Additionally, for Dynamo RFA automation, users can now automate families (such as furniture and mechanical equipment) and update them in batches.
- **Improved Performance and Flexibility** with new task templates, the ability to choose Revit worksets for tasks and increased folder-scanning options for projects, and enrich ease of use for BIM team members.

Live Demonstrations

Learn about the value of IMAGINiT Clarity 2019.1's new features from IMAGINiT industry experts who will be providing demonstrations at the AU 2018 IMAGINiT booth, A221.

For those not attending AU 2018, IMAGINiT experts will host a complimentary webcast to highlight Clarity's new features on November 29th at 2PM Eastern. [Attendance is free, but advanced registration is required.](#)

For more information on IMAGINiT's Clarity software as well as a complete range of BIM technology solutions, visit IMAGINiT at booth A221 at Autodesk University or visit www.imaginit.com/clarity.

About IMAGINiT Technologies

[IMAGINiT Technologies](#), a division of [Rand Worldwide](#), advances the way architects and engineers design, develop, and manage projects. Customers of this leading professional services and technology company include organizations in the building, infrastructure, manufacturing and facilities management industries. Organizations of all sizes work with IMAGINiT Technologies to gain competitive advantages through expert technology consulting, implementation, training, and support services. As one of the world's largest integrators of Autodesk 3D design and engineering software, the team leverages unrivalled industry experience to design systems that accelerate innovation while improving project quality and profitability.
