

New Features for IMAGINiT Clarity Unveiled at Autodesk University 2019

*Top ENR Firms Save Thousands of Project Hours through Task Automation
and Improved Collaboration*

BALTIMORE, MD – November 18, 2019 – [IMAGINiT Technologies](#) launches [Clarity 2020.1](#) which optimizes Autodesk Revit and increases the efficiency of BIM teams by automating tasks, analyzing data and model health, and enhancing collaboration. The latest update of IMAGINiT Clarity expands and strengthens integrations with software such as Autodesk BIM 360, AutoCAD and Navisworks and includes enhancements to core task automation capabilities and functionality while also improving data visualization.

“There’s a reason why BIM teams, whether they’re from a small design firm or in the ENR Top 50, get excited when IMAGINiT releases a new version of Clarity,” says Bill Zavadil, chief operating officer, IMAGINiT Technologies. “The Clarity products are constantly evolving as our team of developers keeps a finger on the pulse of how AEC design firms use different software systems to improve their BIM projects. By opening up Clarity’s API to developers for instance, Clarity accesses an ecosystem of collaboration tools to allow BIM managers to track, analyze and manage all project related BIM data in one place.”

“Today, all Perkins and Will teams use Clarity on all projects,” says Matt Petermann, digital practice manager, Perkins and Will. “And, to date, we have saved 293,812 hours and saving time means saving money. Our employees are spending less time on drudgery and more on interesting and innovative design activities. Plus, there are fewer delays. This all means that our employees and clients are happy.”

IMAGINiT Clarity is the foundation of the IMAGINiT Clarity product family, which includes IMAGINiT Clarity Security, allowing secure external collaboration for those using Revit Server, and IMAGINiT Clarity Owner Data Portal for owners and facilities managers who wish to access model data in a simple format.

New in Clarity 2020.1

Compatible with Autodesk Revit 2017 - 2020, Collaboration for Revit and BIM 360 Design, IMAGINiT Clarity 2020.1 includes many new features including:

- **Deeper integrations** with Autodesk BIM 360, AutoCAD, Navisworks, BIMTrack and Microsoft One Drive, Teams and SharePoint increase users’ ability to collaborate via their platform of choice.
- **Opening the Clarity API** for developers allows organizations to quickly start new projects that have consistent standards.
- **Improved automation of core tasks** helps increase communication by automating tasks such as sending model exports to multiple locations, and more flexible scheduling.

- **Better visualization of data** to help transform data into useful insights such as a new reporting timeline that shows when specific team members have been working on a project.

Tech Trio Prize Pack & Live Demos at Booth

Learn about the value of IMAGINiT Clarity 2020.1's new features from IMAGINiT industry experts who will be celebrating the launch of the latest version of Clarity in IMAGINiT's booth (AE330) at [Autodesk University \(AU\) 2019](#). Visitors will have the opportunity to be entered into a drawing for a Tech Trio Prize Pack which includes a Rocketbook with pen and beacons to turn any space into a whiteboard, a 360 Degree Camera and a Cube Smart Tracker.

Clarity 2020.1 Webcast

Can't attend AU2019? See IMAGINiT Clarity 2020.1's new features and the value that Clarity software brings to BIM projects by joining a 60-minute, expert-led webcast on December 11, 2019 at 12:00 PM Eastern. Attendance is free, but [registration](#) is required.
