

## **IMAGINiT Technologies' Experts Present at Festival of BIM**

*Learn how to Find, Collect and Use Construction Related Data to Proactively Mitigate Risk and Protect Profitability*

**BALTIMORE, MD – July 7, 2020** — Mitigating risk throughout a construction project is all about data – collecting the right data and understanding what it means so firms can take logical, measured, and appropriate action. Learn from three [IMAGINiT Technologies'](#) experts who will share actionable takeaways in their presentation at the free, virtual [Festival of BIM and Digital Construction](#) event on July 8, 2020 at 11:00 am EDT.

“Construction firms often unknowingly take on unnecessary risk that may dramatically impact timelines, productivity, profitability and ultimately a firm’s reputation,” says Joe Eichenseer, professional services manager, IMAGINiT Technologies. “Because construction sites are complex and the digitization of the construction process has further increased the volume of data available for analysis, firms today have a great opportunity to leverage this data to protect both themselves and their partners while providing their clients with an improved final product.”

This 60-minute online presentation by IMAGINiT’s Joe Eichenseer, professional services manager for building solutions, Jim Stoneberger, senior solutions consultant and Norman Akin, senior applications expert, will include:

- Using Autodesk BIM 360's Construction IQ to leverage predictive, assistive, and action-based intelligence
- Identifying high risk issues that have the potential to impact cost, schedule, quality, and safety
- Evaluating subcontractor performance and predicting potential risks on a day-to-day basis and for future projects
- Understanding high risk quality problems and actions to mitigate those risks
- Taking proactive measures before incidents happen with indicators for behavioral and environmental hazards

[Register](#) now to attend this free educational panel discussion. To learn more about IMAGINiT’s risk mitigation solutions, visit <http://www.imaginit.com> or for immediate assistance with a current project speak with an IMAGINiT expert at 1-800-356-9050.

### **About IMAGINiT Technologies**

[IMAGINiT Technologies](#), a division of [Rand Worldwide](#) (OTCBB: RWWI), advances the way architects and engineers design, develop, and manage projects. Customers of this leading professional services and technology company include organizations in the building, infrastructure, manufacturing and facilities management industries. Organizations of all sizes work with IMAGINiT Technologies to gain competitive advantages through expert technology consulting, implementation, training, and support services. As one of the world’s largest integrators of Autodesk 3D design and engineering software, the team leverages unrivalled industry experience to design systems that accelerate innovation while improving project quality and profitability.
