Rand Secure Data Highlights eDiscovery's Role in Data Governance at LegalTech West Coast Conference

Company to Showcase Predictive Coding at Booth #414

FRAMINGHAM, MA – June 19, 2014 – Rand Worldwide (OTCBB: RWWI), a global leader in providing technology solutions to organizations with engineering design and information technology requirements, today announced that its Rand Secure Data division will demonstrate its eDiscovery solution at the LegalTech West Coast conference in Los Angeles, CA from June 24-25, 2014. Visit booth #414 for an interactive demonstration.

"The perfect storm is brewing because employees are working on multiple platforms including laptops, tablets and smartphones," says Eric Carpenter, director of enterprise applications for Rand Worldwide. "Not only does this electronic information have to be stored, but it should be archived and indexed, as well as be easily searchable and retrievable. This is why predictive coding is an integral component of our eDiscovery and data governance approach."

Predictive coding significantly reduces the cost and time needed for eDiscovery while increasing the effectiveness of searches. This statistically proven method allows legal teams access to relevant documents earlier in the litigation process than previous manual process or keyword searches. Predictive coding also takes the subjectivity out of the process, providing an objective, reliable and clear audit trail that stands up in court. For more information on predictive coding, watch this brief overview video.

Visit Rand Secure Data's booth (#414) at LegalTech West Coast for an interactive demonstration of predictive coding technology and learn about its role in data governance. Further details are available at www.randsecuredata.com.

About Rand Secure Data

Rand Secure Data, a division of Rand Worldwide (OTCBB: RWWI), is a leading provider of data governance solutions that combine ultra-security and high-performance with simplicity, accessibility and affordability. Rand Secure Data offers industry leading data archiving, email archiving, backup and eDiscovery solutions that allow companies to simplify IT strategies, lower overall costs and free up resources without having to make any sacrifices in terms of functionality, security or control.

As a division of Rand Worldwide, one of the world's leading professional services and technology companies for the engineering community, Rand Secure Data has more than 30 years of experience developing and delivering technology solutions to customers and has offices throughout the United States and Canada.
