

Rand 3D Brings Training Solutions to PTC LiveWorx 2019

Training and Custom Documentation Solutions Provide Missing Link in Maximizing Effectiveness of CAD and PLM Software Implementations

BALTIMORE, MD – June 3, 2019 – Effective training underpins every successful CAD and PLM implementation. That’s why Rand 3D is showcasing their suite of training solutions for PTC products in booth K4 at LiveWorx 2019 held at the Boston Convention and Exhibition Centre in Boston, Massachusetts from June 10-13, 2019.

“Training can increase a team’s productivity by ensuring they understand how to effectively use the software, but for this to happen two critical components must come together,” says Meghan Foster, director of business development for Rand 3D. “The first is having instructors who are able to decode years of real world experiences into practical, bite-sized tips that customers can immediately apply in their own work. The second component is leveraging well-honed teaching styles and training materials that together, increase the productivity of individuals as well as the capacity of the entire team. By offering expert-led training classes for PTC software products over the past 25 years, Rand 3D’s Technical Training Engineers have mastered this mix.”

Rand 3D will highlight their training solutions for Creo and Windchill at LiveWorx 2019. Training solutions include in-person classes, LIVE Online training, custom training, and self-paced eLearning. Also on display will be samples of Rand 3D’s custom documentation solutions which integrate a company’s best practices, models and company-specific examples into the training courseware. Companies using custom documentation streamline the learning process, enabling employees to return to work more productive.

[Rand 3D](#) training classes use curriculum developed by [ASCENT- Center for Technical Knowledge](#). ASCENT develops professional, off-the-shelf and custom courseware for the industry’s leading design engineering software applications, including those from PTC.

Visit booth K4 and pick up a voucher to save 30% off all Creo classes, plus bring your DX Challenge stamp card for a chance to win a prize provided by LiveWorx. Talk to Rand 3D experts to learn more about Rand 3D’s training solutions for [Creo and Windchill](#) as well as their [customized training and documentation solutions](#).
