

Rand 3D Showcases Training and Software Solutions at AeroDef 2019

*Productivity Enhancing Capabilities Targeted to Aerospace and Defense Design Engineers
Highlighted in Booth 2045*

Baltimore, MD — April 25, 2019 – At AeroDef 2019, [Rand 3D](#) will bring over 25 years of experience helping thousands of aerospace and defense professionals around the world become more proficient with their Dassault Systèmes and PTC software. Rand 3D experts will be on hand in booth 2045 to discuss their unique approach to training, design engineering and custom documentation solutions that ensure a comprehensive understanding and increased adoption of CAD and PLM 3D design software. AeroDef 2019 takes place at the Long Beach Convention Centre in California from April 30 – May 1, 2019.

“Rand 3D has a long history of providing strategies, tools and training to help aerospace and defense customers better leverage technology so they can drive innovation within their organizations,” says Meghan Foster, director of business development at Rand 3D. “We are often approached by companies implementing a PLM system because our expert team delivers increased adoption with customized training and documented workflows.”

Training, documentation and support offerings from Rand 3D provide aerospace and defense companies with a holistic package that increases the productivity and capacity of internal design teams whether they be engineers, engineering managers, CAD and project managers, PLM managers or design managers. Learning solutions include instructor-led classes, self-paced eLearning and customized training in addition to PLM documentation services and technical writing services.

Visitors to the Rand 3D booth (#2045) will receive a 30% discount off Dassault Systèmes training solutions (in-class and online) and will also be entered in a draw for a \$200 gift card. Visit [Rand3D.com](#) to learn more about their [CATIA](#) classes, [Creo](#) classes, [Custom Training](#) and [Aerospace and Defense Software Solutions](#).

About Rand 3D

Rand 3D, a division of Rand Worldwide (OTCBB: RWWI), provides professional, industry leading training solutions through a full-time, dedicated teaching faculty for Dassault Systèmes and PTC software users. With over 30 years of industry experience, backed by a team of subject matter experts, engineers, trainers, and dedicated customer service representatives, this team has the expertise required to offer effective engineering software and training solutions.
