

## **Rand 3D Exhibits at Wards Auto User Experience Conference**

*Rand 3D Showcases Comprehensive Suite of CAD Training and Software Solutions for the Automotive Industry*

**OWINGS MILLS, MD – October 4, 2017** – [Rand 3D](#) will attend the [Wards Auto User Experience Conference](#) on October 5, 2017 and will showcase training solutions for users of PTC and Dassault Systèmes' CAD and PLM software, as well as Dassault Systèmes software solutions for the automotive industry.

Iouri Apanovitch, Senior Technical Training Engineer with Rand 3D will be on hand to share his industry knowledge with attendees. Iouri has spent 20+ years at Rand 3D teaching, mentoring and consulting clients in the areas of finite element analysis and 3D parametric design and prototyping using Knowledge-Based Engineering methods. His wealth of knowledge is highly sought-after in the engineering and CAD communities, and he looks forward to meeting with conference attendees to discuss their latest challenges.

"We help customers by looking beyond their CAD software to find the perfect mix of technology, implementation expertise, and training to ensure a thorough understanding of business processes and workflows throughout the automotive supply chain," says Meghan Foster, sales director at Rand 3D. "We're pleased to be at the Wards Auto User Experience this year to share our experience in recommending technology, tailoring and delivering training programs and courseware to help customers effectively manage their entire design and PLM ecosystem."

Software implementation alone doesn't guarantee system adoption. Rand 3D offers both in-class and virtual training designed to increase on-the-job productivity by identifying and addressing skills gaps across the entire project team. Training classes utilize a variety of learning styles and knowledge assessments, and are presented by the industry's foremost subject matter experts to teach participants how to connect key concepts to manufacturing processes in ways that are engaging. Class participants have access to high-quality training materials developed by [ASCENT- Center for Technical Knowledge](#). ASCENT also works closely with Rand 3D to develop custom workflow documentation that enables the successful adoption of PLM solutions across unique customer environments.

Rand 3D is a member of the Dassault Certified Education Partner Program, providing access to an extensive library of training materials and eLearning solutions for Dassault Systèmes software that helps customers in the automotive industry apply 3D design, CAD and PLM technologies.

## About Rand 3D

[Rand 3D](#), a division of [Rand Worldwide](#) (OTCBB: RWWI), provides professional, industry-leading training solutions through a full-time, dedicated teaching faculty for Dassault Systèmes and PTC software users. With over 30 training centers as well as on-site classes, customers can select the best training option for them. A recognized Dassault Systèmes Solutions Partner, the team also provides software solutions for CATIA, DELMIA, ENOVIA, 3DVIA and PLM Express. With over 25 years of experience, and backed up by a team of subject matter experts, engineers, trainers, and dedicated customer service representatives, this team has the expertise required to offer effective engineering software and training solutions.
